MODULA-C5® is a modular expandable laser controller for up to two independent laser projectors per unit. MODULA-C5® stores laser animations and beam spectacles on hard drive or magneto-optical disk.

Thanks to full random access, unmatched expansion possibilities, its advanced locator concept, the automatic integration of all venue-specific setups and peripheral systems, MODULA-C5® is predestined for smart distributed applications: You merely produce one master copy and your clients have all the desired functions at their disposal by simply pressing "play".

By means of expansion modules MODULA-C5® for example reacts to DMX signals like moving lights, gives you powerful tools to create live spectacles with MIDI or becomes a design console for laser graphics. For more sophisticated applications a DDL®-module, a SMPTE-module and modules for the control of peripheral equipment are available.

But there is much more LOBO can do for you. Experience the possibilities of LOBO lasers at ILDA 2000.

LOBO electronic Robert-Bosch-Strasse 100, 73428 Aalen / Germany, Phone: +49 7361 96 87-0, Fax: +49 7361 96 87-99, Email: mail@lobo.de, URL: www.lobo.de
